## Reader's Section

Editor "R & M":

I like the present cover design. The different issues together in their various colors look very attractive.

May ROCKS and MINERALS prosper in the New Year; and a Happy New Year to the Editor.

MYRTLE G. MILLER

Ackermanville, Penn.

Editor "R & M":

In the interest of the study of minerals, I would like to suggest that you publish a query in the magazine as to which of the readers are interested in getting a copy of the U. S. Geological Survey Bulletin 624—Useful Minerals of the United States. The supply of this bulletin has been exhausted since

1921. Probably if enough people were interested in obtaining copies of the publication we could prevail upon the Director of the Survey to reprint it.

JOSEPH V. LYNSKEY,  
Chicago, Ill.

Editor "R & M":

I wish to express my thanks for the service that one small ad gave me. I received many orders from all parts of the United States, and inquiries from various countries of Europe and elsewhere. Your little magazine is just what I have been looking for. I read everything in it. Even the advertisements are instructive.

FRANK DUNCAN.  
Terlingua, Texas.
